# Sobre Roca

About Roca

## Vocación global

Roca es una empresa dedicada al diseño, la producción y la comercialización de productos para el espacio de baño, pavimentos y revestimientos cerámicos destinados a la arquitectura, la construcción y el interiorismo. El Grupo, de capital íntegramente español, es líder del mercado en Europa, Latinoamérica, India y Rusia. Además tiene una fuerte presencia en China y el resto de Asia, Oriente Medio y África. Roca es líder mundial en su actividad.

## Global vocation

Roca is a company devoted to the design, production and sale of products for bathroom areas and floor and wall tiles for use in architecture, construction and interior design. The Group, which is entirely Spanish owned, is market leader in Europe, Latin America, India and Russia. It also has a strong presence in China and the rest of Asia, the Middle East and Africa. Roca is world leader in its activity.

## Sostenibles por convicción

En Roca nuestro compromiso con el medio ambiente va más allá del cumplimiento de la normativa vigente, con medidas acordes con la economía circular para disminuir el impacto sobre el entorno, con la reducción de consumo de materiales y la reutilización y reaprovechamiento de recursos naturales como el agua.

Todos los productos Roca pueden ayudar a obtener una mejor puntuación en la valoración LEED (Leadership in Energy and Environment Design), la más empleada en la certificación de edificaciones sostenibles, por lo que nuestros recubrimientos y pavimentos contribuyen a la mejora de las características ambientales y facilitan la certificación de sostenibilidad de las edificaciones donde son empleados.

Aplicamos rigurosos programas de mejora continua y criterios sostenibles en todas las fases de nuestro proceso productivo, que se revisan externamente de manera periódica con las certificaciones de Autorización Ambiental Integrada (AAI), ISO 14001, ISO 14021, ISO 9001, DAPcons®, GlobalEPD, UPEC y CCC; como garantía de calidad y respeto medioambiental de nuestros pavimentos y revestimientos cerámicos.

## Sustainable with conviction

In Roca our commitment to the environment goes beyond compliance with the regulations in force, with measures in accordance with the circular economy to reduce our impact on the environment, with the reduction of material consumption and the reuse and recycling of natural resources such as water.

All Roca products can help you obtain a better score in the LEED (Leadership in Energy and Environment Design) metrics, the most widely used Green Building Certification for sustainable buildings, so that our wall tiles and pavements contribute to the improvement of the environmental characteristics and facilitate the sustainability certification of the buildings where they are employed.

We apply rigorous continuous improvement and sustainable criteria programmes at all phases of our production processes, which are reviewed externally on a regular basis with the Integrated Environmental Authorization (AAI), ISO 14001, ISO 14021, ISO 9001, DAPcons®, GlobalEPD, UPEC and CCC certifications; as a guarantee of quality and environmental compliance of our ceramic wall and floor tiles.

## Tipología de producto / Product typology

---

thinbig®

Piezas cerámicas de gran formato para proyectos exigentes. Una colección permeable a la creatividad y el diseño en espacios profesionales, el canal contract o en el hogar, gracias a su diseño limpio, su consistencia, dimensiones y atributos técnicos.

Large format ceramic pieces for demanding projects. A collection permeable to creativity and design in professional spaces, contract channels, or at home, thanks to its clean design, its consistency, dimensions and technical characteristics.

### Pasta Blanca

#### White Body

Una cuidada selección de materias primas son la base de estas colecciones, perfectas para un gran abanico de usos en interior. Superficies cerámicas de altas prestaciones, con el matiz de luminosidad adicional que aporta la pasta blanca al esmaltado, ofrecido en variedad de formatos, complementos decorativos y piezas de uso especial.

Carefully selected raw materials form the basis of these collections, perfect for a wide range of interior uses. High performance ceramic surfaces, with the nuance of additional luminosity that the white-body glazing brings, offered in a variety of formats, decorative complements and special-use pieces.

### Pasta Roja

#### Red Body

Recubrimientos cerámicos de pasta roja idóneos para el hogar, producidos con materias primas locales, arcillas rojas procesadas con la última tecnología e innovación de Roca, para obtener unos acabados esmaltados en tonos terrosos y neutros, rústicos y decorativos y con un alto nivel de calidad.

Red-body ceramic tiles that are ideal for homes, produced with local raw materials, red clay processed with the latest technology and innovation at Roca, to obtain high quality rustic and decorative glazed finishes in earthy tones and neutral colours.

### Porcelánico Esmaltado

#### Glazed Porcelain

Propuestas actuales e inspiradoras para decorar los ambientes en los que trabajas, creas y vives, con colecciones de alta innovación tecnológica. Pavimentos y revestimientos con acabados que sugieren materiales naturales al tacto y a la vista, con el valor añadido del porcelánico.

Inspiring present day proposals to decorate the spaces where you work create and live, with collections of high technological innovation collections. Pavements and wall coverings with finishes suggesting the touch and look of natural materials, with the added value of porcelain.

### Porcelánico Coloreado

#### Full Body Porcelain

Colecciones únicas de porcelánico todo masa con los mismos atributos en su interior y superficie, además de propiedades superiores en dureza, resistencia e impermeabilidad. Sus inalterables acabados reproducen fielmente las texturas y relieves de mármoles, maderas, piedras y cementos, ricos en detalles.

Unique collections of full-body coloured porcelain tiles, with the same qualities in its interior and surface, as well as superior properties of hardness, resistance and impermeability. Their unalterable finishes faithfully reproduce the textures and reliefs of marble, wood, stone and cement in rich detail.

### Porcelánico Pulido

#### Polished Porcelain

Gamas excepcionalmente brillantes en porcelánicos rectificadas, que suman las propiedades de la cerámica a la belleza y reflejo natural propios del mármol pulido, sin las necesidades de cuidado que la porosidad de la piedra suele acarrear.

Ranges of exceptionally bright rectified porcelain tiles, adding the properties of ceramics to the beauty and natural reflections of polished marble, without the need for care the porosity of stone usually requires.

### Acabado superficial / Surface finish

#### Mate / Matt

Un toque sofisticado, sereno, elegante y actual en las paredes. Son revestimientos de tacto agradable, que transmiten calidez sin reflejos, limpios y muy fáciles de mantener.

A chic, elegant, serene and sophisticated touch for on walls. Pleasant to the touch wall tiles, which transmit warmth without reflections, clean and very easy to look after.

#### Natural / Natural

La identidad y los matices de la piedra, madera y cemento trasladados en toda su belleza a superficies que nos aportan una armonía desnuda y sin estridencias.

The identity and the nuances of stone, wood and cement passed onto surfaces in all their beauty to give us a soothing, bare harmony.

#### Lapado / Lapato

Acabados semipulidos que combinan brillo satinado y áreas mate para aportar gran detalle visual en superficies inalterables y fáciles de mantener.

Semi-polished finishes combining a satiny gloss and matt areas to provide great visual detail on unalterable, easy to maintain surfaces.

#### Brillo / Bright

Revestimientos esmaltados de acabados luminosos, con la sensación de amplitud que aporta el reflejo de la luz y sus matices.

Glazed coatings in bright finishes, with a feeling of spaciousness that the reflections of light and its nuances bring.

#### Estructurado / Structured

Texturas pronunciadas en busca de acabados naturales de madera y piedra que son idóneas en áreas donde es requerido un acabado antideslizante.

Pronounced textures in search of natural wood and stone finishes that are suitable in areas where a non-slip finish is required.

#### Pulido / Polished

Propiedades excepcionalmente brillantes, con acabado brillo espejo, alto grado de reflectividad y resistencia en una gama cromática mucho más amplia que la ofrecida por la piedra natural.

Exceptionally bright, properties with a mirror-like shiny finish, which is highly reflective and resistant in a much wider colour range than that offered by natural stone.

ABS

#### Antideslizante ABS / ABS Anti-slip

Pavimentos resistentes al deslizamiento y los valores máximos exigidos por el CTE, Clase 3 R11 para exteriores.

Anti-slip flooring with the maximum values required by the CTE, Class 3 R11 technical building code for exteriors.

IN&OUT

#### In&out

Innovador acabado polivalente con el tacto sedoso y delicado de un pavimento de interior pero certificado CTE Clase 3 R11 para su uso indistinto en interior y exterior.

An innovative, multi-purpose floor tile with a silky feel and sensitivity but a Class 3 R11 CTE technical building code certificate for interior or exterior use indistinctly.

#### Biosafe

Innovador acabado con propiedades altamente antibacterianas que cuidan los criterios estéticos y de diseño con un grado superior de higiene.

Innovate tile finish with highly antibacterial properties that takes care of the aesthetic and design criteria, with a greater degree of hygiene.

LUX

#### Lux

Acabado exclusivo con efecto nacarado, reflejos irisados y matices de ultrabrillo que realzan la superficie y la elevan a la categoría de joya.

Exclusive finish with a pearly effect, iridescent reflections and ultra-glossy sheens enhance the surface and raise it to the category of jewellery.

- G3** Para zonas de tránsito moderado  
For zones with moderate traffic
- G4** Para zonas de mucho tránsito  
For zones with high traffic
- G5** Pavimentos para tránsito intenso  
Floorings with intense traffic

Antes de seleccionar el producto para una instalación se aconseja siempre verificar el grupo de pertenencia del mismo respecto a la aplicación que se vaya a dar.

Para facilitar esta tarea Roca ha elaborado unos grupos de utilización; es una clasificación orientativa y general, basada en la norma de Abrasión Superficial (ISO 10545-7), la escala Mohs (EN-101), la Resistencia Manchas (ISO 10545-14), la Resistencia Química (ISO 10545-13) y la norma de Abrasión Profunda (ISO 10545-6). Con esto los productos Roca están clasificados a modo de guía de ayuda. Dependiendo de las condiciones de uso, el profesional decidirá el producto adecuado en cada caso.

La elección de productos antideslizantes se puede realizar a través del apartado 'Propiedades Antideslizantes'.

Roca recomienda el uso de las Fichas Técnicas del producto que se facilitan a través de nuestra red comercial o en nuestra página web ([www.roca.es](http://www.roca.es)), para un conocimiento mayor del producto y una elección más acertada. Aunque la responsabilidad final de la elección de la cerámica Roca es del usuario y de la dirección de la obra, el equipo comercial y técnico de Roca está dispuesto a asesorarle en la elección del producto cerámico.

Before selecting the product for an installation, it is recommended always to check the group to which it belongs with regard to its intended application.

To facilitate this task, Roca has drawn up a list of use groups, which is a general orientative classification based on the Surface Abrasion standard (ISO 10545-7), the Mohs scale (EN-101), Stain Resistance (ISO 10545-14), Chemical Resistance (ISO 10545-13), the Deep Abrasion standard (ISO 10545-6). In this way, Roca's products are classified for guidance. Depending on the conditions of use, the professional will decide on the most suitable product.

The choice of non-slip products can be made in accordance with the 'Non-Slip Properties' Section.

Roca recommends the use of the Product Specification Sheets available through our commercial network or on our website ([www.roca.es](http://www.roca.es)), in order to be more familiar with the product and make the most suitable choice. Although the final responsibility of the choice of the Roca ceramic tile lies with the user and the works management, Roca's commercial and technical staff will be pleased to advise you on the choice of the ceramic product.

## Propiedades antideslizantes / Non-slip properties

Clase CTE (ENV 12633)	Valores de rampa Ramp values	Piés descalzos Barefoot
<b>C1</b> Clase 1	<b>R9</b>	<b>A</b>
<b>C2</b> Clase 2	<b>R10</b>	<b>B</b>
<b>C3</b> Clase 3	<b>R11</b>	<b>C</b>

## Destonificado / Shade variation

 <b>V1</b> Muy bajo Very low	 <b>V2</b> Bajo Low	 <b>V3</b> Medio Medium	 <b>V4</b> Alto High
--	---	---	--

### Observa la variación cromática del producto cerámico que escojas

La variedad de materias primas y pigmentos utilizados en la composición de los productos cerámicos y sus peculiaridades pueden dar como resultado azulejos con distintas oscilaciones en tono o textura en su acabado final.

En determinadas ocasiones, la multitud de matices que se obtienen con los cambios de tono, relieve y destonificaciones tienen el objetivo de mimetizarse con las piedras, maderas o cementos que los inspiran. Esa variación se convierte en un valor añadido que aporta a los suelos y paredes.

Para facilitar información sobre nuestro producto cerámico y su diversidad cromática, lo hemos clasificado en cuatro niveles, donde las piezas clasificadas con categoría V1 prácticamente no tienen cambios de tono, destonificación o textura en su acabado, la clasificación V2 es para piezas con una variación leve, la V3 cuando la variación es media y la V4 cuando se produce una gran complejidad de matices de color, de textura o hay una gran destonificación entre piezas.

Por ello, antes de escoger un acabado cerámico, conoce el producto y sus detalles, observa con qué categoría de variación cromática está clasificado y escoge el que mejor se adapte al espacio y a tus necesidades.

### Observe the colour variations in the ceramic product you choose

The variety of raw materials and pigments used in the composition of ceramic products and their peculiarities can result in tiles with different fluctuations in tone or texture in their final finish.

On certain occasions, the multitude of nuances that are obtained with changes in tone, relief and detoning have the objective of mimicking the stones, wood or cement that inspire them. This variation becomes an added value to contribute to floors and walls.

To provide information about our ceramic products and their chromatic diversity, we have classified them into four levels, where the pieces classified with category V1 have practically no changes in tone, detoning or texture in their finish, the classification V2 is for parts with a slight variation, V3 is when the variation is average and V4 is when there is a great complexity of shades of colour, textures or significant detoning between existing pieces.

Therefore, before choosing a ceramic finish, get to know the product and its details, see in what colour variation category it is classified and choose the one that best suits the space and your needs.

## Reciclado / Recycled

Fabricado con un mínimo de 50% de materiales reciclados de pre-consumo y puede contribuir a obtener puntos LEED.

Made with a minimum of 50% recycled pre-consumer material and may contribute to obtain LEED points.

Fabricado con un mínimo de 25% de materiales reciclados de pre-consumo y puede contribuir a obtener puntos LEED.

Made with a minimum of 25% recycled pre-consumer material and may contribute to obtain LEED points.

Abbey Vison 19,5x120 R / 8"x48" R

# Abbey

Con Abbey los interiores se rinden al cálido encanto de la madera sin tratar. Un pavimento sencillo y libre de ornamentos que expresa su naturalidad en largos listones que homenajean a los suelos de tarima rústica.

With Abbey any interior will give in to the warm charm of untreated wood. A simple, unadorned floor tile that expresses its naturalness in long planks that pay tribute to rustic floorings.

## Abbey

Lejos de artificios y estridencias, este pavimento Porcelánico Coloreado se despliega en colores y tintes tradicionales: Fresno, Roble, Visón y Gris. Una propuesta porcelánica de alta calidad disponible en dos largos con acabado natural o antideslizante para exteriores o zonas de agua.

Far from tricks and fanfare, this Full Body Porcelain floor tile unfolds in traditional colors and shades: Fresno, Roble, Visón and Gris. A high-quality porcelain proposal available in two different lengths with a natural or antislip finish for outdoor or water areas.

Bosco Roble 19,5x120 R / 8"x48" R

# Bosco

En un prodigio técnico que desafía los sentidos, **Bosco** consigue capturar la esencia de las lamas de madera recién cortada en una propuesta porcelánica para pavimentos en los que, como en la naturaleza, es imposible detectar un patrón.

A technical prodigy that defies the senses, **Bosco** is able to capture the essence of the freshly cut wooden slats in a porcelain proposal for floor tiles in which, as in nature, it is not possible to find a pattern.

## Bosco

A la medida de aquellas almas cautivadoras que tampoco se parecen a nadie, esta colección emula a la impredecible madera natural en tres tonos –Roble, Visón y Gris– llenos de variedades cromáticas y matices. La serie cuenta también con una opción decorada, Suite Bosco, que hace el efecto de pequeños listones de madera.

Tailored to those captivating souls that do not look like anyone, this collection replicates the unpredictable natural wood in three hues –Roble, Visón and Gris– full of colour ranges and nuances. The collection also features a decorated option, Suite Bosco, which provides the effect of small wooden planks.

St Tropez Verde 13x13 / 6"x6" - Fraké Natural 19,5x120 R / 8"x48" R

## Fraké

Una madera tranquila por su gama cromática, pero evocadora por su originalidad y acabado distinto con una veta profunda y contrastada que aporta gran riqueza visual.

Su textura aparentemente lisa, revela un sutil efecto de polvo nacado gracias a la combinación de multitud de puntos mate y otros más brillantes, dotándole del brillo natural de la madera tratada.

A soothing wood due to its colour range, that is evocative in originality and its distinct finish, with deep, contrasting veins that add great visual richness.

Its seemingly smooth texture reveals a subtle, pearly powder effect thanks to the combination of multitudes of matte and bright points, giving it a natural treated-wood shine.

Indiana Nocce 19,5x120 R / 8"x48" R

# Indiana

La belleza de la madera más sofisticada se traslada a formatos porcelánicos únicos por su singularidad y riqueza cromática. Cada lama de Indiana reúne matices esenciales en una apuesta por un acabado natural que reproduce los nudos y fendas de la madera original, su textura y las vetas profundas marcadas en tonos castaños.

The utmost beauty and sophistication of wood is passed on to porcelain formats unique in their distinctness and rich colouring. Each Indiana slat joins essential shades in a commitment to a natural finish that reproduces the knots and cracks of original wood, its texture and deep-veined, pronounced chestnut-tones.

Indiana Roble 19,5x120 R / 8"x48" R

**Porcelánico Coloreado** / Full Body Porcelain

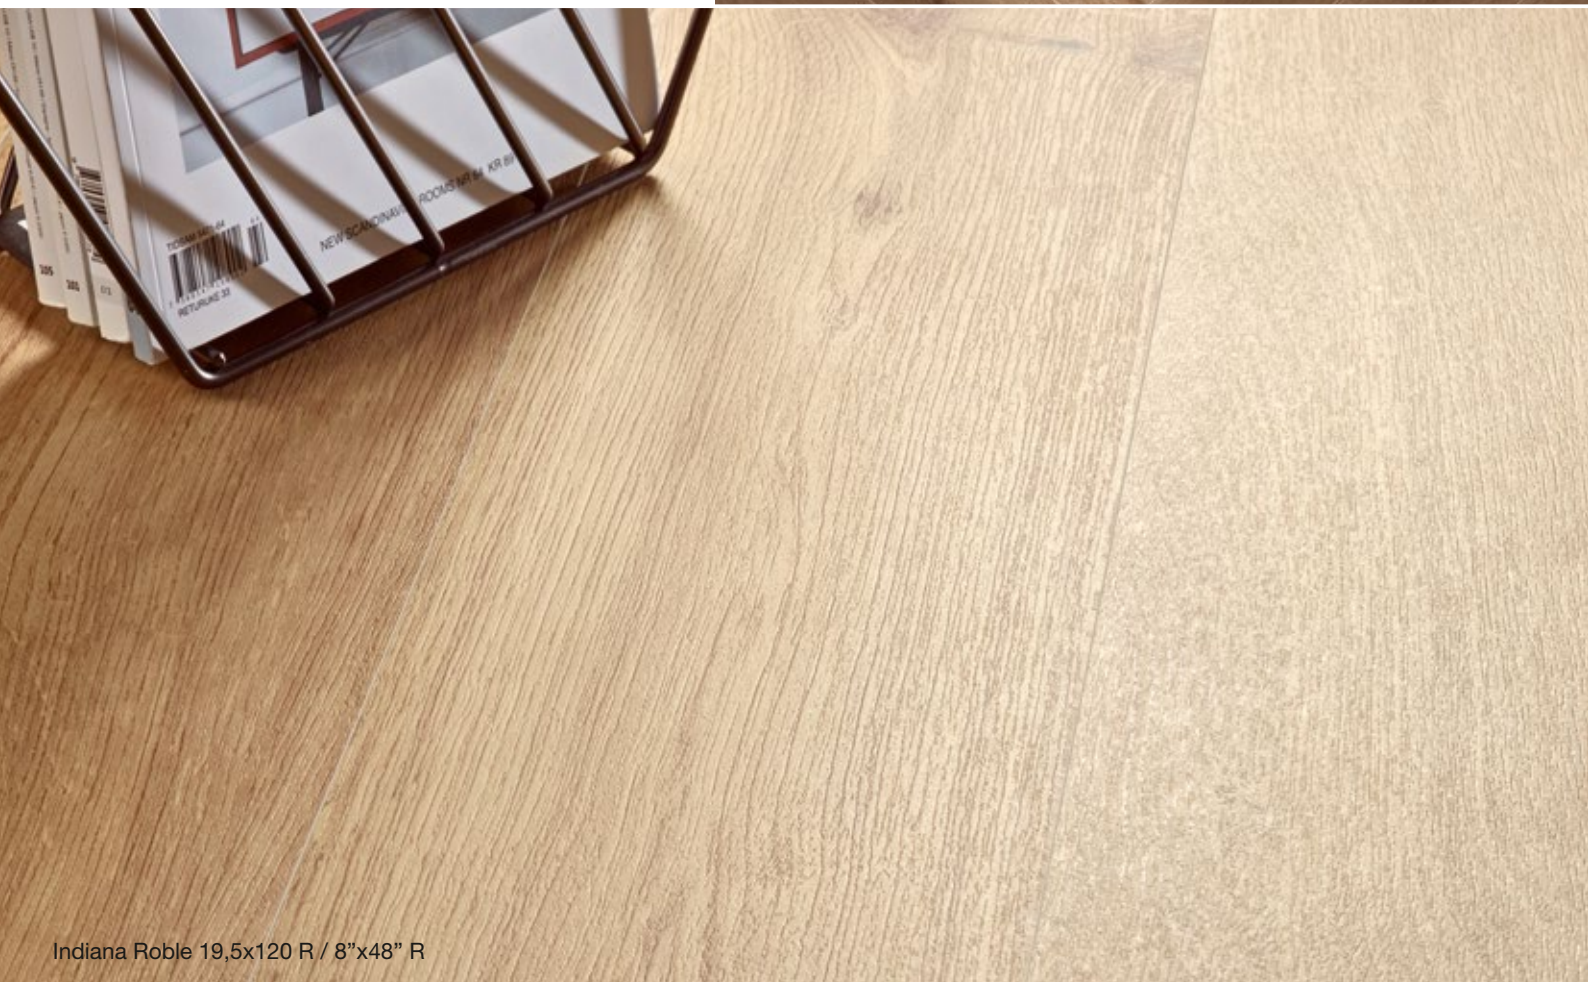

◇ 19,5x120 R / 8"x48" R

# Indiana

La cuidada manufactura está presente en la composición de la superficie con satinados naturales que recogen la luz igual que lo haría la madera apenas tratada, plagada de detalles brillo y mate propios de una superficie orgánica. Indiana compite a los ojos y al tacto con la madera real y la supera en atributos.

Its painstaking manufacture feels present in the make-up of its natural satin surface that captures light, just like barely treated wood, rich with the shiny and matte details typical to an organic surface. Indiana competes with real wood in vision and touch and beats it in character.

## Marble Calacatta

Marble Calacatta es vitalidad y equilibrio, te ofrece la versatilidad de la piedra en sus mismos acabados, con gamas y formatos que se adaptan a la necesidad del espacio, revestimientos en formato extra largo y fino espesor, baldosa cuadrada e incluso malla de pequeño formato.

Las composiciones con Marble Calacatta generan atmósferas únicas y espacios luminosos tanto en su acabado natural, como con el balance entre mate y brillo del Lapato o la luz resplandeciente del acabado pulido.

Marble Calacatta is vitality and balance, offering you the versatility of stone in its own finishes, with ranges and formats that are adapted to the needs of the space. Wall coverings that are extra-long and thin, square tiles and even small-format meshes.

Marble Calacatta compositions generate unique atmospheres and bright spaces as much so in their natural finish as well as the balance between the matt and the shine of the lapato or the bright light of the polished finish.

## 48"x100"

## Lujo e inteligencia a gran escala. Large-scale luxury and intelligence.

Las Láminas Superformatos Roca son grandiosas, no solo por su tamaño sino porque derrochan inteligencia, al unir lo mejor del diseño y la tecnología. Es el nuevo lujo, en la medida correcta para usted y para el medio ambiente.

Roca Super Size Slabs are grand not only due to their size, but also because they splash out intelligence by bringing together the best in design and technology. It is the new luxury, just right for you and the environment.

**250 cms.:** Altura interior estándar.  
**100 inches:** Standard ceiling height.

- **Juntas de 2 mm.:** mayor amplitud visual.
- **Multiuso:** son más resistentes que las piedras naturales, ideales para suelos, paredes y encimeras.
- **Colocación rápida:** con un espesor de apenas 7 mm, son mucho más livianos y fáciles de cortar.
- **Más sustentable:** producción nacional exclusiva y menos pérdida de material en la obra.
- **La mayor diversidad de diseños y acabados:** reproducción HD de mármoles, cementos y otros diseños.
- **Just 2 mm.:** broader visual range.
- **Multipurpose:** more resistant than natural stones, they are optimal for floors, walls and countertops.
- **Quick set:** only 7mm thick, they are much lighter and easier to cut.
- **More sustainable:** exclusive national production and less material loss on site.
- **The greatest diversity of designs and finishes:** HD reproduction of marbles, cements and other patterns.

Basel Caliza 60x120 R / 24"x48" R

# Basel

La naturaleza es perfecta pero hay quienes sueñan con mejorarla. Basel reproduce el suave tacto de la roca volcánica pulida por el agua y su textura bajo la luz en una propuesta porcelánica de altísimas prestaciones para pavimento y revestimiento.

Nature is perfect but there are those who dream of improving it. Basel replicates the soft touch of volcanic rock polished by water and its texture under the light in a porcelain proposal for floor and wall tiles with an outstanding performance.

# Universo de posibilidades

Formatos modulares Roca

# Universe of possibilities

Roca modular formats

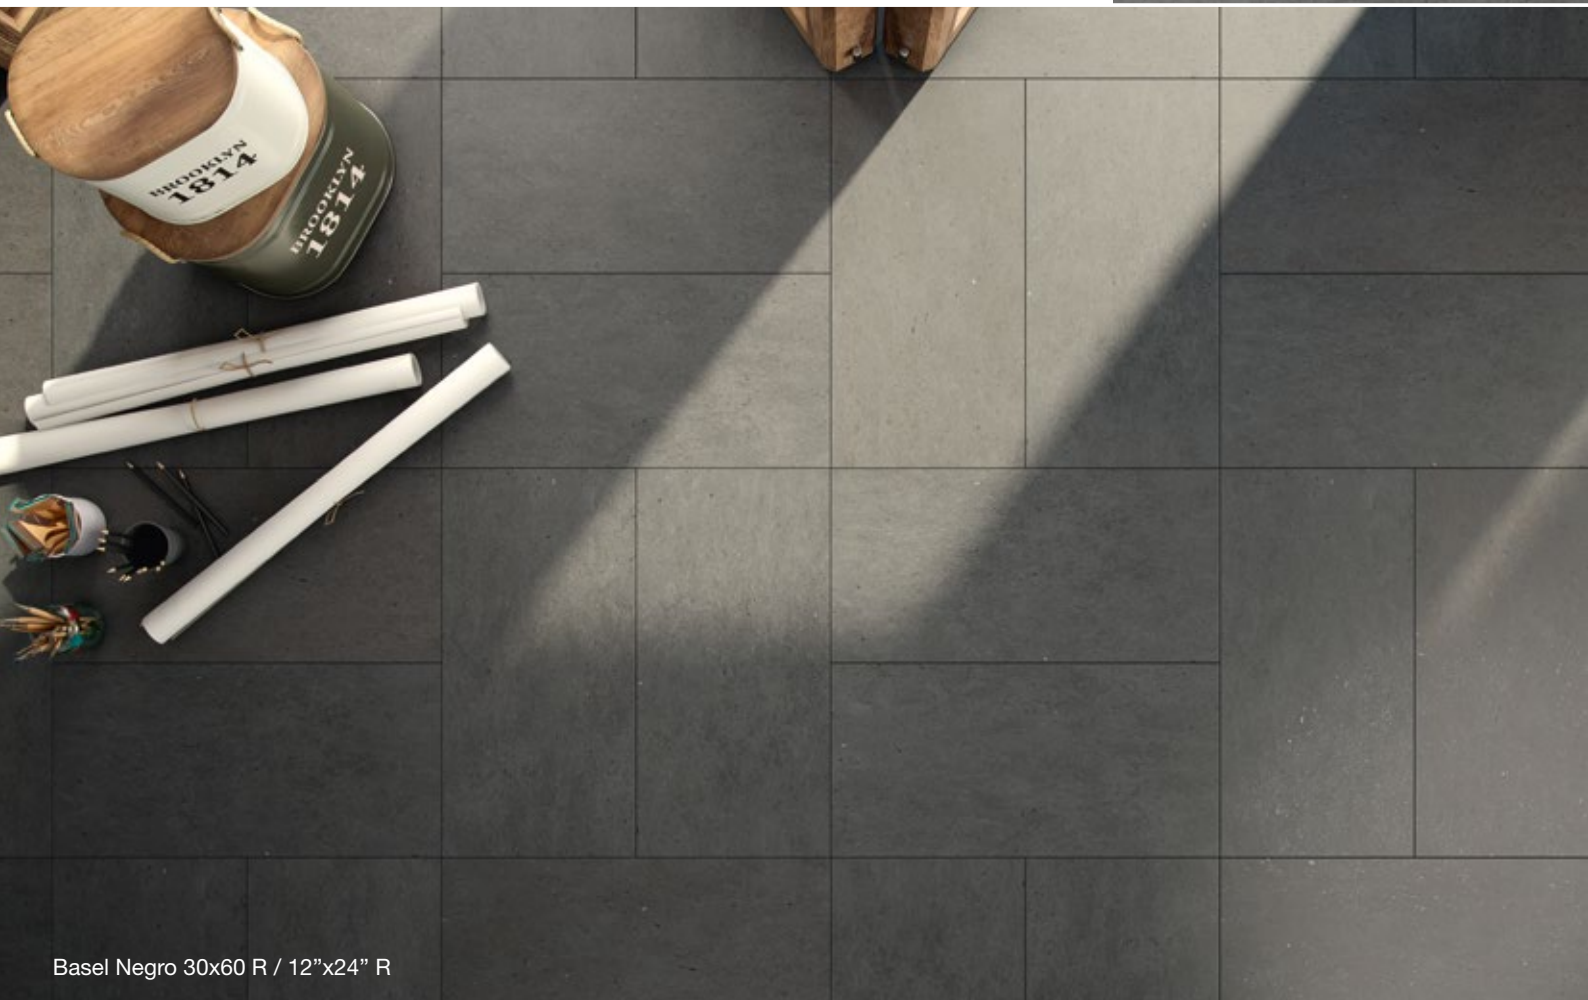

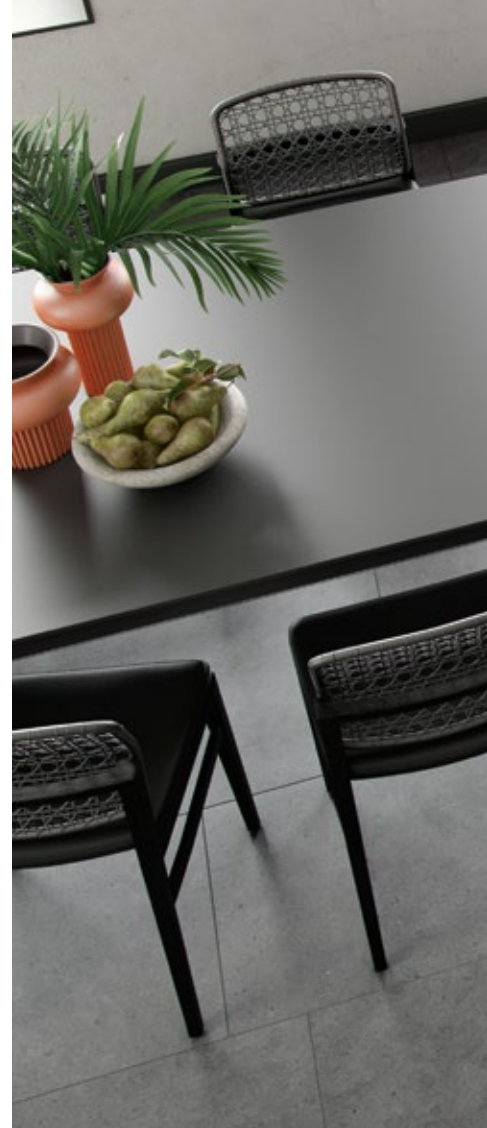

Los formatos modulares de Roca estimulan nuestra creatividad con colecciones de grosor unificado cuyo distintos tamaños de pieza son combinables entre sí, para que el único límite en nuestro proyecto lo ponga nuestra imaginación.

Dando un paso más allá del mero proceso de rectificado, hemos establecido un grosor común para todas las colecciones y estandarizado a 2 mm el ancho de junta. Gracias a ello, nuestras colecciones modulares permiten el empleo conjunto de distintos tamaños de pieza sin problemas de encaje.

The modular formats of Roca stimulate our creativity with collections of unified thickness whose different sized parts are combinable between them, so that the only limit to our project is set by our imagination.

Taking one step further than the mere grinding process, we have established a common thickness for all our collections and standardized the joint to a 2 mm width. Thanks to this, our modular collections allow the use of different sizes of set pieces without problems of fit.

# Couvet

El granito y la piedra se funden en una moderna composición que mira al tradicional suelo de terrazzo para reinventarlo en una amplia variedad de formatos y acabados en porcelánico esmaltado y revestimiento.

Reinvented stoneware. Granite and stone join in a modern composition inspired by traditional terrazzo flooring to reinvent it in a wide range of formats and finishes in wall tile and floor tiles.

Couvet Arena 120x120 R / 48"x48" R - Abbey Vison 19,5x180 R / 8"x72" R

Perfectos para suelos que han de aunar delicadeza y resistencia en proyectos arquitectónicos públicos y privados, las propuestas de Couvet para suelo están disponibles en Gris, Visón, Arena y Perla, los dos últimos tonos con una versión Deko que evoca, veladamente, un paisaje de hojas de palma.

Perfect for floors that need to combine delicateness and resistance in public and private architectural projects, Couvet's floor proposals are available in Gris, Visón, Arena and Perla, these two last colors in a Deko version that faintly recalls a landscape of palm leaves.

Limestone Arena 60x60 R / 24"x24" R

# Limestone

Matices y juegos de reflejos dotan de vida y realismo a una colección que se inspira en los compuestos de piedra caliza para reproducir con mimo cada partícula, luminiscencia o matiz de estas superficies.

Shades and a mix of reflections bring life and realism to a collection inspired by limestone compounds to carefully replicate every particle, luminescence or nuance of these surfaces.

# Suite Bosco

p. 57

El contrapunto idóneo de Limestone es la calidez en madera de Suite Bosco. Atrévete a vestir tus paredes en un tapiz continuo de finos listones de madera, gracias al formato 30x60 R / 12"x24" R rectificado.

The ideal counterpoint to Limestone is the warmth of Suite Bosco wood. Dare to dress your walls in a continuous tapestry of thin wooden slats, thanks to its 30x60 R / 12"x24" R rectified format.

Limestone Gris 31x61 / 12"x24" - Suite Ocala Silver Grey 31x61 / 12"x24" - Limestone Gris 61,5x61,5 / 24"x24"

## Suite Ocala

p. 77

Si prefieres sumarte a la tendencia Japandi y conectar con la naturaleza, escoge Suite Ocala y acondiciona tu espacio con revestimientos cerámicos de maderas claras con piezas de aspecto muy natural decoradas con ligeros surcos. Limestone, Suite Bosco y Suite Ocala, tres combinaciones con capacidad decorativa que realzan el conjunto.

If you prefer to join the Japanese trend and connect with nature, choose Suite Ocala and treat your space with very natural looking ceramic woods decorated with light furrows. Limestone, Suite Bosco and Suite Ocala: three combinations packing the decorative power to heighten the whole.

Elogio al mármol marquina y a la sobria elegancia de los interiores art deco, Mystery evoca la piedra oscura delicadamente veteada en blanco para mirar a espacios modernos donde el estilo se integra con la naturaleza.

A tribute to Marquina marble and to the sober elegance of art deco interiors, Mystery brings to life dark stone with delicate white veining to create modern spaces in which style blends with nature.

Terranova Negro 60x120 R / 24"x48" R

# Terranova

Un negro intenso que es cualquier cosa menos sombrío. La elegancia natural de la pizarra, su tacto satinado y las sutiles láminas de sus capas ahondan en la naturalidad de una pieza que evoca el efecto desgastado de la piedra natural añadiéndole las inalterables prestaciones del porcelánico.

The intense black colour is anything but sombre. The natural elegance of slate, its satin touch and the subtle sheets of its layers delve into the naturalness of a piece that recalls the worn effect of natural stone by adding the unchanging performance of porcelain tiles.

Terre Gris 60x60 R / 24"x24" R - Niza Azul 20x20 / 8"x8"

# Terre

El barro cocido, la piedra y el cemento pintado coinciden en una propuesta porcelánica que se inspira en el estilo de vida de la Europa más cálida. Terre vuelve la mirada a la tradición de la vida en la calle, el sol y la joie de vivre para devolver una gama de pavimento y revestimiento que es un regreso al origen y al hogar.

Baked clay, stone and painted cement reunite in a porcelain proposal inspired by the warmest European lifestyle. Terre looks back to the tradition of life on the streets, the sun and the joie de vivre to provide a range of floor and wall tiles that represent a return home, to our origins.

## Terre

también combina con: / also combines with:

### Niza | p. 372

### St Tropez | p. 373

El uso de los contrastes lejos de resultar disonante puede ser atractivo y enriquecedor. Por ello la evocación de lo natural y sostenible de la colección Terre adquiere una nueva perspectiva combinada con sus piezas decorativas.

Los mosaicos cerámicos de efecto vítreo de St. Tropez y la evocación hidráulica con base coral y las nuevas propuestas geométricas de Niza, nos trasladan a una estética coherente, contemporánea y vintage a partes iguales.

Far from clashing, the use of contrast can be attractive and enriching. This is why the natural and sustainable evocation of the Terre collection acquires a fresh look when combined with its decorative pieces.

The glass effect of the ceramic mosaics of St. Tropez, the evocation of coral-based hydraulics and the latest geometric proposals of Niza, lead us to a coherent aesthetic that is contemporary and vintage alike.

# 20mm

## El compacto para largo recorrido The compact for the long-haul

Los nuevos pavimentos espesados de 20 mm de Roca superan en altas prestaciones, funcionalidad y estética, a los materiales naturales utilizados en suelos. Las características extraordinarias de este porcelánico retan a la piedra en su uso como pavimento de aplicación en exteriores y en zonas de gran tránsito.

En estas colecciones el pavimento ha ganado consistencia y espesor para incrementar su resistencia. Junto a ello, la tecnología de Roca añade cualidades como la mínima porosidad de las piezas, perdurabilidad de colores con el paso del tiempo, propiedades antideslizantes certificadas CTE Clase 3 y adaptación en espacios heterogéneos.

The new Roca 20mm thickened pavements surpass the high performance, functionality and aesthetics of natural materials used in flooring. The extraordinary features of this stoneware challenge stone in the use as a pavement installed in exteriors and in high transit areas.

In these collections the pavement has gained consistency and thickness to increase its resistance. Along with this, the Roca technology adds qualities such as the minimum porosity of the parts, long-lasting colours with the passage of time, certified Class 3 CTE anti-slip properties and its adaptation in diverse spaces.

Abaco Gris 60x60 R / 24"x24" R

# Abaco

Innovadora, versátil y extremadamente funcional, Abaco es una colección que eleva los matices del cemento a su máxima expresión y los mejora con la perdurabilidad del porcelánico.

Innovative, versatile and extremely functional, Abaco is a collection that takes the nuances of cement to their highest level, improving them with the durability of porcelain tiles.

Abaco In&Out Grafito 60x120 R / 24"x48" R - Abaco Grafito 60x120 R / 24"x48" R

◇ 60x120 R / 24"x48" R - 60x60 R / 24"x24" R - 30x60 R / 12"x24" R

▬ 40x120 R / 16"x48" R

Abaco Grafito 60x120 R / 24"x48" R

Desde el acabado Natural, más cercano al cemento trabajado, al resistente satinado del Lapado, una tercera opción, el acabado In&Out, proporciona una superficie sedosa y altamente anti-deslizante perfecta para interior, exterior y fachada. Disponible en una amplia gama cromática de tonos neutros y óxidos, también presenta líneas decorativas con relieves de efectos orgánicos o geométricos.

From the Natural finish, closer to crafted cement, to the resistant satin finish of Lapado, a third option, the In&Out finish, provides a soft and highly antislip surface, ideal for indoors, outdoors and facades. Available in a wide colour range of neutral and rusty hues, it also features decorative lines with reliefs and organic or geometrical effects.

Abaco Oxido 60x120 R / 24"x48" R - Abaco Oxido 60x60 R / 24"x24" R  
Abaco Oxido 30x60 R / 12"x24" R

## IN&OUT

### El primer pavimento antideslizante suave The first soft non-slip floor tile

El acabado In&Out es fruto del compromiso de I+D del Grupo Roca. El innovador proceso de fabricación desarrollado en In&Out, proporciona una superficie sedosa a la vez que antideslizante, llegando a los valores máximos exigidos por el CTE, Clase 3 para exteriores.

The finish for In&Out is the result of the Roca Group's commitment to R&D. The innovative manufacturing process developed for In&Out, provides a silky, and at the same time, non-slip surface, reaching the maximum values required by the Class 3 Technical Building Code for exteriors.

Derby Negro 60x60 R / 24"x24" R

# Derby

Derby es una colección de estética industrial inspirada en el cemento pulido marcado por el uso. Los cambios tonales pronunciados de este porcelánico coloreado difuminan y enmarcan visualmente los bordes de las piezas evocando un efecto de desgaste que proporciona a los ambientes una belleza imperfecta y singular.

Derby is an industrial aesthetic collection inspired in worn, polished concrete. The pronounced tonal changes of the tile blur and visually frame the piece-edges, creating an effect of wear that offers its environment a rare, imperfect beauty.

Downtown Biosafe Blanco 60x120 R / 24"x48" R

# Roca Biosafe Tile

El innovador acabado Biosafe Tile tiene propiedades altamente antibacterianas gracias al complejo proceso de investigación y desarrollo tecnológico aplicado en la producción de nuestro porcelánico coloreado en masa.

El centro tecnológico AINIA, con 2.800 m<sup>2</sup> de infraestructuras analíticas que dan respuesta a las diversas necesidades del sector alimentario y afines, ha verificado las propiedades antimicrobianas del nuevo porcelánico mediante una prueba de ensayo basada en la norma ISO 22196, que determina la capacidad antibacteriana de superficies no porosas.

Las sustancias activas incorporadas al esmalte de las piezas son capaces de inhibir el crecimiento de bacterias. Este nuevo desarrollo incrementa el grado de seguridad y confianza en el material cerámico y es idónea para espacios que requieren un plus de higiene.

The innovative Biosafe Tile finish has properties with highly antibacterial activity thanks to a complex process of research and technological development applied in the production of our mass-coloured porcelain.

The AINIA technology centre, with 2,800 m<sup>2</sup> of analytical infrastructures that respond to the diverse needs of the alimentary and related sectors, has verified the antimicrobial properties of our new porcelain tile by means of a test based on the ISO 22196 standard, which determines the antibacterial capacity of non-porous surfaces.

The active substances incorporated into the enamel of the pieces are capable of inhibiting the growth of bacteria. This new development increases the degree of safety and confidence in the ceramic material and is suitable for rooms that require extra hygiene.

**Verificado por el centro tecnológico AINIA**

Verified by the AINIA technology centre

## Características

Product attributes

Downtown Biosafe Gris 60x120 R / 24"x48" R

### **Eficacia total contra las bacterias** **Total effectiveness against bacteria**

Roca Biosafe Tile cuenta con propiedades de efecto bacteriostático que proporcionan una seguridad adicional ante patógenos a los que la superficie cerámica pudiera ser expuesta.

Roca Biosafe Tile has properties with a bacteriostatic effect that provide additional safety against pathogens to which the ceramic surface could be exposed.

### **Contrastado 100%** **100% Calibrated**

Las propiedades antimicrobianas han sido verificadas por el centro tecnológico AINIA mediante pruebas de ensayo basadas en la norma ISO 22196: 2011, que determina la capacidad antibacteriana de superficies no porosas.

ISO 22196 Eficacia antibacteriana garantizada.

The antimicrobial properties have been verified by the AINIA technological centre through trial testing based on the ISO 22196: 2011 standard, which determines the antibacterial capacity of non-porous surfaces.

ISO 22196 Antibacterial effectiveness guaranteed.

### **Inocuo para la salud humana** **Safe for human health**

Determinados elementos naturales impiden el metabolismo microbiano por lo que las bacterias no pueden sobrevivir ni desarrollarse sobre la superficie cerámica fabricada con este componente. Estas propiedades de Roca Biosafe no afectan de modo alguno al ser humano.

Certain natural elements, prevent microbial metabolism due to which bacteria cannot survive or develop on a ceramic surface made with this component. These properties of Roca Biosafe do not affect human beings in any way.

Downtown Biosafe Gris 60x120 R / 24"x48" R

### **Sin mantenimiento ni tratamientos posteriores Without subsequent maintenance or treatments**

El componente antimicrobiano de Roca Biosafe Tile forma parte de la materia prima del porcelánico por lo que permanece en él tanto tiempo como vida tiene este material y no requiere de ningún tipo de tratamiento para conservar sus propiedades.

The antimicrobial component of Roca Biosafe Tile is part of the raw material of porcelain, so it remains within it for as long as the life of this material and does not require any type of treatment to preserve its properties.

### **Con todas las propiedades de los porcelánicos Roca With all the properties of Roca porcelain tiles**

Esta nueva característica se suma a la durabilidad, higiene, facilidad de limpieza, confort y diseño de nuestros porcelánicos. Junto a las propiedades antimicrobianas permanecen propiedades asépticas naturales de la cerámica, atributos de los pavimentos y revestimientos cerámicos como ausencia de porosidad, lo que le confiere un índice de absorción casi nulo, inalterabilidad y larga vida útil.

This new feature adds to the durability, hygiene, easy cleaning, comfort and design of our porcelain tiles. The antimicrobial properties remain along with the natural aseptic properties of ceramics, attributes of ceramic flooring and claddings such as the absence of porosity, which give it an almost zero absorption rate, inalterability and a long useful life.

### **Propiedades definitivas Definitive properties**

Las propiedades de Roca Biosafe Tile son permanentes y no se desgastan con el paso del tiempo.

The properties of Roca Biosafe Tile are permanent and do not break down with the passage of time.

## Dónde utilizar Roca Biosafe Tile

### Where to use Roca Biosafe Tile

Innovación, atención al detalle y calidad certificada técnica y medioambientalmente, hacen de Roca el mejor aliado para tus proyectos. Porque la salud empieza con el suelo adecuado, los porcelánicos dotados con Roca Biosafe Tile son idóneos para espacios que requieren un plus de higiene como superficies de instalaciones sanitarias, áreas comerciales, de hostelería, así como en proyectos de interiorismo.

Innovation, attention to detail, and technically and environmentally certified quality, make Roca the best ally for your projects. Because health begins with the right floor, porcelain tiles with Roca Biosafe Tile are ideal for spaces that require extra hygiene such as surfaces in health facilities, commercial areas, hospitality areas, as well as interior design projects.

Momentum Gris 80x80 R / 32"x32 R

# Momentum

La colección Momentum es fruto de una simbiosis de texturas textiles y acabado porcelánico, elegantes al tacto y a la vista. Esta gama se ofrece en colores neutros como el gris, grafito, arena y taupe, que combinan en contraste con las piezas estampadas de la colección.

The Momentum collection is the fruit of a symbiosis of textile textures and porcelain finishes, elegant to the touch and to the eye. This range is offered in neutral colours such as Gris, Grafito, Arena and Taupe, which combine and contrast with the collection's stamped pieces.

# Tailor

Cemento de inspiración industrial para proyectos que aspiran a no pasar de moda. Tailor bebe de los suelos pulidos de los primeros lofts de Nueva York y los renueva en una paleta de colores perfecta para quienes planifican espacios que deben adaptarse a múltiples necesidades.

Industrial-inspired cement for projects that never go out of style. Tailor finds its inspiration in the polished floors of the first lofts in New York City, renovating them in a perfect colour palette for those who plan spaces that need to adapt to multiple needs.

# Weekend

Cuando el concepto toma fuerza sobran los ornamentos. Sutileza en colores y sobriedad en formas para un pavimento de estilo industrial especialmente indicado para espacios de paso y contract. Weekend emula el cemento desgastado para combinar a la perfección con sus variadas opciones de revestimiento.

When the concept takes hold any ornaments are superfluous. Subtle colors and sober forms for a floor tile with an industrial style, especially suited for highly transited and contract areas. Weekend replicates worn cement to perfectly combine with its varied wall tile options.

¿Por qué hay que dar algo por sentado?. Imprevisible y moderna, Weekend invita a un viaje que no tiene fecha de regreso. Desde la modernidad del cemento a la tradición hidráulica o los detalles de madera trabajada, pasando por originales relieves de corte contemporáneo, la gama propone originales revestimientos que ponen en valor su sobria propuesta para suelo.

Why do you need to take something for granted? Unpredictable and modern, Weekend invites us on a journey with no return date. From the modernity of cement to the hydraulic tradition or the details of worked wood, passing through original reliefs with a contemporary character, this range proposes original wall tiles that add value to its sober proposal for floorings.

# Fabric / Tweed

Un tributo a los tejidos, a la calidez de las alfombras y al bienestar de los interiores domésticos. Tactos de tela y punto conforman un pavimento que recoge la tersura de la moqueta junto a las prestaciones técnicas de la cerámica.

A tribute to the fabrics, the warmth of the carpets and the well-being of domestic interiors. Cloth and knit touches make up a floor covering the smoothness of the carpet along with the technical performance of ceramics.

# 100x200cms

## 40"x80"

## Lujo e inteligencia a gran escala. Large-scale luxury and intelligence.

Las Láminas Superformatos Roca son grandiosas, no solo por su tamaño sino porque derrochan inteligencia, al unir lo mejor del diseño y la tecnología. Es el nuevo lujo, en la medida correcta para ti y para el medio ambiente.

Roca Super Size Slabs are grand not only due to their size, but also because they splash out intelligence by bringing together the best in design and technology. It is the new luxury, just right for you and the environment.

**200 cms.:** Cabe en el ascensor.

**80 inches:** Fits the elevator.

- **Juntas de 2 mm.:** mayor amplitud visual.
- **Multipurpose:** son más resistentes que las piedras naturales, ideales para suelos, paredes y encimeras.
- **Colocación rápida:** con un espesor de apenas 7 mm, son mucho más livianos y fáciles de cortar.
- **Más sostenible:** producción nacional exclusiva y menos pérdida de material en la obra.
- **La mayor diversidad de diseños y acabados:** reproducción HD de mármoles, cementos y otros diseños.
- **Cabe en el ascensor.** Fácil de transportar.
- **Just 2 mm.:** broader visual range.
- **Multipurpose:** more resistant than natural stones, they are optimal for floors, walls and countertops.
- **Quick set:** only 7mm thick, they are lighter and easier to cut.
- **More sustainable:** exclusive national production and less material loss on site.
- **The greatest diversity of designs and finishes:** HD reproduction of marbles, cements and other patterns.
- **Fits the elevator.** Easy to transport.

Silence Tender Grey 40x120 R / 16"x48" R

# Silence

Minimalismo orgánico para una gama de revestimiento que se siente cómoda en mitad de la naturaleza más extrema. Como si de paredes esculpidas en la nieve se tratara, Silence juega con los volúmenes para devolver un tacto único.

Organic minimalism for a range of wall tiles that fits well into the most extreme nature. As if it were sculpted in the snow, Silence plays with volumes to provide a unique touch.

# Whites

Suite Weekend Blanco 30x90,2 R / 12"x36" R

La pureza del blanco nunca pasa de moda y mantiene siempre su gran capacidad de marcar tendencias. La atracción por los formatos panorámicos en relieve se demuestra además en cada una de las piezas de la Colección Whites, diseñadas con el más alto sentido estético y un gusto indiscutible por el blanco.

The purity of the white never goes out of style, and retains its matchless ability to set trends. The appeal of panoramic formats in relief is also apparent in each of the items in the Whites Collection, designed with a matchless sense of aesthetics and an undeniable flair for white colour.

## 3D Collection

Ins Organic Blanco Mate 30x90,2 R / 12"x36" R

Realzar una zona concreta de una estancia, destacar una pared en esencia o generar efectos a gran escala de movimiento, composiciones que se salen del lienzo para estimular nuestros sentidos e imprimir carácter en los ambientes donde se ubican.

Enhance a specific area of a room, highlight the essence of a wall or generate large-scale effects of movement, compositions that leap from the canvas to stimulate our senses and give character to the environments where they are situated.

# Decorativa

La clave está en los detalles  
The key is in the details

Casablanca Spice 20x20 / 8"x8"

Maiolica Blue Steel 11x25 / 4,5"x10" - Memory Blanco 61,5x61,5 / 24"x24"

Hexagono Mini Blanco 31x26,5 / 12"x10"

Los suelos y paredes cobran protagonismo como elementos decorativos en sí mismos. Para acentuar ese papel clave, Roca incluye en cada colección una línea Deko con vocación inspiradora.

Superficies sofisticadas, originales, funcionales, decorativas, evocadoras del pasado o vanguardistas que visten pavimentos y revestimientos en materiales cerámicos con resultados sorprendentes.

Floors and walls come into prominence as decorative elements in themselves. To accentuate/emphasize this key role, Roca has included a Deko range in each collection with the vocation to inspire.

Surfaces/original, functional, decorative, sophisticated innovations that evoke the past or are cutting edge to furnish floors and walls in ceramic materials with surprising results.

# Innovación en soluciones modulares

## Innovation in modular solutions

En Roca exploramos y adoptamos nuevos estándares de diseño y fabricación para ofrecer soluciones modulares de interiorismo y arquitectura de altas prestaciones, sin límites a tu imaginación.

El uso de elementos modulares hace posible la confección de patrones a partir de una serie de elementos básicos diferenciados, generando variedad y permitiendo infinitas posibilidades de combinación entre ellos.

Hemos adoptado la norma UNE 14411 que rige los requisitos de fabricación para baldosas cerámicas, estandarizando el ancho de junta a 2mm y previendo dicho espacio en las dimensiones de toda nuestra colección modular, con piezas rectificadas de 60x120 R / 24"x48" R, 60x60 R / 24"x24" R y 30x60 R / 12"x24" R, que pueden ser combinadas entre sí, sin problemas de encaje.

Realizamos también rigurosas pruebas para determinar y utilizar un espesor optimizado y común en todas nuestras piezas. Este formato análogo, además de facilitar su combinación, mejora su transporte y almacenamiento y nos permite ser más eficientes y respetuosos con el medio ambiente.

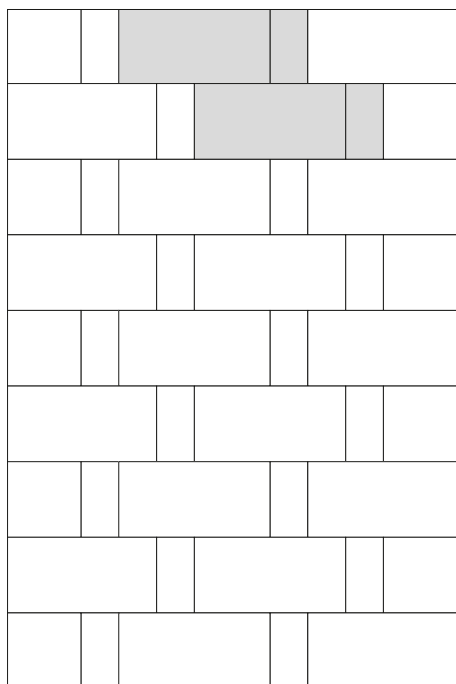

In Roca we are exploring and adopting new standards of design and manufacturing to offer high performance modular solutions for interior design and architecture, without limits to your imagination.

The use of modular elements makes it possible to prepare design patterns from a series of differentiated basic elements, generating variety and allowing infinite possibilities of combinations between them.

We have adopted the UNE 14411 standard that regulates the manufacturing requirements for ceramic tiles, standardizing the joint width to 2mm and providing this space in all our modular collection sizes with rectified 60x120 R / 24"x48" R, 60x60 R / 24"x24" R and 30x60 R / 12"x24" R pieces, which can be seamlessly combined without any fitting problems.

We also carry out rigorous testing to determine and use an optimized common thickness in all of our pieces. This format, in addition to facilitating combinations, improves transportation and storage and allows us to be more efficient and environmentally friendly.

# Propiedades antideslizante

## Antislip properties

Las propiedades antideslizantes de la cerámica fabricada por Roca se clasifican en función del ensayo que se utilice:

Método	
<b>PÉNDULO (ENV 12633)</b>	Simula un zapato que oscila sobre el azulejo.
<b>RAMPA (DIN 55130 y 51097)</b>	Sitúa a la persona sobre una plataforma de azulejos, dicha plataforma se va inclinando hasta resbalar.
<b>ASTM C1028</b>	Simula el deslizamiento por arrastre de una pesa sobre el azulejo.
<b>TORTUS (ISO-10545/17A) DECOF (ANSI 137.1)</b>	Se realiza con un aparato mecánico que se desplaza a velocidad constante.

Los métodos de ensayo no son equivalentes entre si, debido a las propias características del ensayo. No obstante, cuanto mayor sea el valor obtenido, más antideslizante será el producto.

Es muy importante seleccionar bien las propiedades antideslizantes del material en función del uso final.

En la siguiente tabla se detallan los valores en función de cada ensayo. Los valores indicados en esta tabla son orientativos y por eso Roca recomienda el uso de las Fichas Técnicas del producto que se facilitan a través de nuestra red comercial, para un conocimiento mejor del producto que facilite una elección más acertada.

The non-slip properties of Roca's ceramic tiles are classified according to the test used:

Method	
<b>PÉNDULO (ENV 12633)</b>	Simulates a shoe swinging across the tile.
<b>RAMP (DIN 55130 and 51097)</b>	Places the person on a platform of tiles which tilts until the person slips.
<b>ASTM C1028</b>	Simulates the dragging of a weight over the tile.
<b>TORTUS (ISO-10545/17A) DECOF (ANSI 137.1)</b>	Diluted acids: vinegar, hydrochloric acid

The diversity of test methods used means that the same diversity exists with regard to the recommended use, since the methods are not comparable between themselves, although it is true that the greater the value obtained, the greater the non-slip rating of the product.

It is very important to select the non-slip properties of the material in accordance with the intended use.

The following table shows the values according to each test. The values shown in this table are orientative, and therefore Roca recommends using the Technical Sheets of the product provided by our commercial network to gain better knowledge of the product in order to facilitate the most appropriate choice.

# Recomendaciones de colocación

## Installation recommendations

Una colocación adecuada y cuidadosa de los productos fabricados por Roca es vital para hacer resaltar al máximo las características técnicas de los mismos. Por este motivo, es necesario:

1. Verificar el calibre, tono y calidad del producto, antes de la colocación.
2. Escoger herramientas de instalación adecuadas (llana dentada, maza de goma blanda, ventosa y llana de goma para la aplicación de la junta).
3. Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad.
4. Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado. (Norma de referencia: EN-1348).
5. Para formatos rectangulares y/o de gran formato (lado mayor de 60 cm) se recomienda el uso de sistemas nivelados como campanas o cuñas para garantizar una correcta colocación.
6. El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto. Roca Cerámica recomienda colocar la cerámica con una junta mínima de 1mm y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).
7. No se debe utilizar junta de color que contenga negro de humo (carbón micronizado), ni tintes que pueden dificultar la limpieza de la superficie revestida.
8. Limpiar los restos de rejuntado de la superficie de las baldosas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.
9. Una vez colocado el azulejo, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación andamios/escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las baldosas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección, no debe dañar ni contener productos químicos que dañen al azulejo.

### Especial para mallas:

Para conseguir el efecto malla, las piezas deben rejuntarse en su totalidad. La colocación de las mallas Roca es sencilla y rápida.

### Especial para las series destonificadas:

Para obtener un excelente acabado estético en cuanto al diseño y apreciar todas sus cualidades, Roca recomienda que se mezclen baldosas del mayor número de cajas posible antes de iniciar la instalación.

### Especial colocación de peldaños:

El soporte estructural debe estar totalmente limpio y enrasado en superficie. Empezar la colocación desde arriba hacia abajo.

Es imprescindible no dejar zonas sin cemento cola.

Macizar completamente el hueco entre la pared y el borde interior del peldaño.

Colocar siempre la tabica (contra-huella) al mismo nivel que el peldaño.

Se recomienda la protección del peldaño durante la obra.

Se deben evitar golpes directos a los peldaños durante la obra y una vez instalados.

### Especial colocación de formatos rectangulares:

La colocación a rompejunta de formatos rectangulares nunca debe realizarse en la mitad de la pieza.

Se aconseja que para mantener la estética y evitar dificultades en su instalación, la colocación a rompejunta no supere el 25% del lado sobre el que se aplica.

Para formatos rectangulares y/o de gran formato (lado mayor de 60 cm.) se recomienda el uso de sistemas nivelantes de tipo rosca, para no dañar a la pieza al extraer dicho sistema, y para garantizar una correcta colocación.

Correct, careful laying of Roca's ceramic products is vital for taking full advantage of their technical characteristics. For this reason, the following points are necessary:

1. Check the calibre, tone and quality of the product before laying.
2. Choose appropriate installation tools (toothed trowel, white rubber hammer, suction grip and rubber trowel for pointing).
3. Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.
4. Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).
5. For rectangular and/or large formats (side larger than 60 cm) the use of a leveling system such as wedges are recommended to ensure a correct installation.
6. The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. Roca Cerámica recommends laying the tiles with a minimum joint of 1 mm and checking for other indications given on the box (measurements between calibres, recommended joint).
7. Do not use coloured pointing material containing black smoke (micronised carbon) or dyes which can hamper the cleaning of the tiled surface.
8. Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.
9. Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration. The materials used for this protection must not be harmful or contain chemical products which may damage the tiling.

### Special for meshes:

To achieve the mesh effect, the pieces must be completely pointed.

### Special for the shade variation series:

To obtain an excellent aesthetic finish in terms of design and to appreciate all of its qualities, Roca recommends mixing tiles from the greatest possible number of boxes before commencing installation.

### Special for laying steps:

The substrate must be perfectly clean and smooth.

Begin laying from the top downwards.

Do not leave any zones without cement glue.

Fill completely the gap between the wall and the lower edge of the step.

Always place the riser at the same level as the step.

It is recommended to protect the step surfaces while working.

Avoid direct blows to the steps both during and after installation.

### Special for laying rectangular formats:

When laying rectangular formats discontinuously, never do so in the centre of the piece.

In order to maintain the aesthetic appearance and avoid difficulties in installation, we recommend that discontinuous laying does not exceed 25% of the side to which it is applied.

For rectangular and large formats (side larger than 60 cm) the use of a leveling system such as wedges are recommended to ensure a correct installation.

For fitting, a threaded levelling system is recommended to avoid any damage to the pieces when removing the system; and to ensure a proper fit.

# Colocación 20mm

## 20mm Installation

### Aplicación sobre césped / Dry application on grass

Los caminos peatonales en espacios verdes se pueden formar fácil y rápidamente gracias a NG Performa20. El producto es práctico, económico y respeta el medio ambiente, en cuanto a adhesivos, juntas y trabajos de colocación, ya que no se requiere durante la aplicación en seco de los mismos.

Pedestrian paths in green spaces can be formed easily and quickly thanks to NG Performa20. The product is practical, economic and environmentally friendly inasmuch as adhesive, joint and laying work is not required during the dry application thereof.

#### 1 Preparación

El patrón de mosaico es aplicado sobre el césped. Se excava con una pala el área del tamaño del Azulejo. El terreno se prepara cavando a una profundidad de unos 5-6 cm.

#### Preparation

The tile pattern to be applied on grass is decided. The area is excavated through virtue of a shovel according to the size of tiles. The ground is made ready by digging at a depth of about 5-6 cm.

#### 2 Capa estabilizadora

Los guijarros se fijan para ajustar la altura vertiéndolos en el pozo con la ayuda de un calibre. Se recomienda una capa de espesor de guijarros de al menos 3 cm.

#### Stabilizer layer

Pebbles are fixed in order to adjust height by pouring them into the pit with the help of gauge. Preparation of at least a 3 cm - thickness pebble layer is recommended below the application area.

#### 3 Aplicando azulejos

Los azulejos se aplican aproximadamente 1 cm debajo del nivel del paso.

#### Applying tiles

Tiles are applied approximately 1 cm under the grass level

#### 4 Ajuste de nivel

El mazo de goma se utiliza para alinear el césped con los azulejos.

#### Level adjustment

Rubber mallet is utilized in order to align the lawns with the tiles.

## Aplicación con mortero / Application with mortar

NG Performa20 se aplica en áreas de alto tráfico. Gracias a su estructura duradera, es la solución perfecta para áreas públicas e instalaciones industriales.

NG Performa20 is applied by usual technique in high traffic areas. Thanks to its durable structure, it is the perfect solution for public areas and industrial facilities.

### 1 Preparación de mortero

El mortero adhesivo se prepara antes de colocar los azulejos. Se debe utilizar cemento y morteros de unión.

#### Preparation of adhesive mortar

Adhesive mortar is made ready prior to placing the tiles. Cement based, high performance and super flexible bonding mortars have to be utilized.

### 2 Aplicación de mortero a la tierra

Debe aplicarse con el adhesivo, en ambos lados de la superficie y de vuelta al azulejo. Se debe dejar secar al menos 24 horas después de la aplicación del mortero, para proceder a la aplicación de la junta.

#### Application of adhesive mortar to the ground

Application should be made by applying the adhesive on both sides of the surface and back to the tile. It should be let to dry for at least 24 hours after the application of the adhesive mortar and then proceed with the joint application.

### 3 Aplicación juntas

Se recomienda dejar un espacio de al menos 5 mm. El espacio de unión en terrenos blandos debe ser de al menos 1 cm. El Uso de KYK Megafuge Flex se aplicará en áreas de alto tráfico.

#### Joint application

It is recommended to leave a joint gap of at least 5mm. The joint gap must be at least 1cm in soft grounds. Usage of KYK Megafuge Flex joint is recommended in high traffic areas.

### 4 El último paso

Antes de que las juntas se sequen, se recomienda limpiarlas con productos químicos adecuados y toda la superficie con abundante agua.

#### The last step

The joints must be removed before it dries. Recommended chemicals for cleaning should be utilized and the surface should be rinsed by plenty of water.

# Mantenimiento

## Entretien

Para mantener la belleza y elegancia de la cerámica Roca, se aconseja la limpieza periódica del material, con sistemas convencionales.

Para la eliminación de restos de polvo y sólidos: por barrido o aspiración. No se debe utilizar mopas atrapapolvo con siliconas y ceras.

El lavado de la superficie se debe realizar con jabón neutro y la cantidad de agua caliente recomendada por el fabricante.

No se deben usar productos de limpieza abrillantadores, cerosos o con aditivos similares ya que con el paso del tiempo pueden dejar una capa impermeabilizante sobre la cerámica que altera el aspecto superficial de la misma.

Es recomendable la colocación de felpudos, que deberán permanecer limpios, en las entradas a los lugares pavimentados, ya sea desde la calle, terrazas o jardines, para evitar la entrada de elementos abrasivos. Se recomienda especial cuidado en zonas cercanas a playas u obras que pueden aportar arenas y piedras.

Es aconsejable poner protecciones a los objetos que por arrastre pudieran marcar el producto (patas metálicas de mesas, sillas, etc.), teniendo especial rigurosidad con productos brillantes y satinados.

Si la suciedad no se elimina completamente, facilitamos la siguiente tabla, donde se encuentran los agentes limpiadores adecuados para cada tipo de suciedad:

Tipo de mancha	Agente de limpieza
<b>Aceite, Tinta, Rotulador, Tomate, Frutas, Chocolate, Grasa</b>	Disolvente orgánico: alcohol, aguarrás o acetona Detergente alcalino ya sea en líquido o en polvo Bicarbonato
<b>Alquitrán, Caucho, Betún, Pintura, Graffiti, Cera, Resinas, Rotulador, Esmalte de uñas</b>	Disolvente orgánico: alcohol, aguarrás o acetona
<b>Café, Helado, Nicotina, Vino</b>	Detergente alcalino ya sea en líquido o en polvo
<b>Cal, Cemento, Cerveza, Depósitos metálicos, Refrescos, Zumos</b>	Ácidos diluidos: vinagre, sulfamán o ácido clorhídrico
<b>Cola, Goma de mascar, Goma de neumático o zapato</b>	Disolvente orgánico: alcohol, aguarrás o acetona Ácidos diluidos: sulfamán o ácido clorhídrico
<b>Sangre, Mercromina, Yodo</b>	Oxidante: Agua oxigenada
<b>Incrustaciones</b>	Agua a presión

Nunca hay que utilizar productos que contengan fluorhídrico, sólo los indicados en la tabla anterior.

Todos los productos indicados en la tabla se pueden encontrar fácilmente en droguerías y centros comerciales habituales.

### Especial para porcelánicos pulidos:

Una vez instalado todo el material y habiendo limpiado los restos de cemento, rejuntado y cualquier material de obra, en algunos productos pulidos, debido al tratamiento superficial de inertización "anti manchas" que se le realiza, puede observarse la presencia de una película "grasa" en la superficie de las piezas. En caso de presentarse esta situación, Roca recomienda la limpieza de la superficie con productos de limpieza en seco (detergentes en polvo), y una vez eliminada esa fina película protectora proceder a la limpieza del producto de la forma anteriormente indicada. Por otro lado, en condiciones extremas de iluminación se pueden producir reflejos y sombras debido al alto grado de brillo y las características del producto.

Se recomienda limpiar las manchas de forma inmediata.

To maintain the beauty and elegance of Roca tiles, we advise daily cleaning with conventional methods.

To remove remains of dust and solids: sweeping or vacuum cleaning. Do not use dust-catcher mops with silicones and waxes.

The surface must be washed with neutral soap and the amount of hot water recommended by the manufacturer.

Do not use cleaning products containing wax, brighteners or similar additives, since in time they may leave a waterproof layer on the tile which alters its surface appearance.

We strongly recommend the use of doormats, which must remain clean, in entrances to tiled areas, whether from the street, terrace or garden, to prevent the entry of abrasive elements. We recommend special care in zones close to beaches or construction works, where there is a risk of sand and stones being brought in.

It is advisable to place protections on objects which can mark the tiles if dragged (metal table legs, chairs, etc.), being especially careful with shiny and satin-finished products.

If the tiles cannot be cleaned completely, we provide the following table showing suitable cleaning agents for each type of dirt:

Type of stain	Cleaning agent
<b>Oil, ink, marker pen, tomato, fruit, chocolate, grease</b>	Organic solvents: alcohol, turpentine, acetone Alkaline detergents in liquid or powder form Bicarbonate
<b>Tar, rubber, shoe polish, paint, graffiti, wax, resins, marker pen, nail varnish</b>	Organic solvents: alcohol, turpentine, acetone
<b>Coffee, ice cream, nicotine, wine</b>	Alkaline detergents in liquid or powder form
<b>Lime, cement, beer, metal deposits, soft drinks, fruit juices</b>	Diluted acids: vinegar, hydrochloric acid
<b>Glue, chewing gum, tyre or shoe rubber</b>	Organic solvents: alcohol, turpentine, acetone Diluted acids: hydrochloric acid
<b>Blood, mercromina, iodine</b>	Oxidant: oxygenated water
<b>Incrustations</b>	Pressurized water

Never use any products containing hydrofluoric acid, only those indicated in the table above.

All the products shown in the table can easily be found in ordinary household stores and shopping centres.

### Special for polished porcelain tiles:

In the case of polished porcelain tiles, once all the material has been laid and the remains of cement, pointing and any other building material have been cleaned off, on some polished surfaces the presence of an 'oily' film can be observed due to the 'stain-resistant' inertisation treatment they are given. If this occurs, Roca recommends cleaning the surface with dry cleaning products (detergents in powder form) and, once this fine protective film has been eliminated, cleaning the tiles as indicated above. In extreme lighting conditions, light reflections may occur due to the high degree of brightness and the characteristics of the product.

We recommend removing stains immediately.

# Información técnica de thinbig®

thinbig® technical information

thinbig®

## MANIPULACIÓN

1. Para desplazar y levantar las cajas de producto thinbig®, se recomienda utilizar carretillas elevadoras, cogiendo las cajas centradas por el lado largo. Si la caja se coge por el lado corto se recomienda utilizar palas de 2,5m. de longitud, y si se coge por el lado largo, usar palas de al menos 1,20m.

Para evitar que la caja flexe y se pueda partir el producto, hay que separar las palas al máximo.

2. La manipulación de la placa se efectuará siempre con las cajas cerca de la superficie a revestir, con la ayuda de otra persona (nunca solo), sosteniéndola por la parte superior y manteniéndola recta con las esquinas protegidas de golpes accidentales. Si no se hace correctamente, se pueden generar fisuras en la pieza, que posteriormente derivarán en una rotura. Una alternativa de manipulación manual más robusta, se consigue con ventosas dobles apoyadas en un bastidor (este equipo se puede adquirir en tiendas especializadas de materiales de construcción). Con esta herramienta se evitan flexiones en la pieza.

3. Apoyar la pieza thinbig® sobre el lado largo y colocarla siempre sobre material blando (poliestireno, goma, madera,...) adecuadamente separado. Colocarla con un ángulo aproximado de 30° contra la pared.

4. Para el almacenamiento en horizontal, apoyar la pieza sobre la mesa de trabajo evitando así que se curve. Es muy importante asegurarse de que la superficie esté limpia y sea plana, sino, puede ser la causa de rotura de piezas al efectuar cortes o perforaciones.

Para su manipulación manual, llevar siempre guantes de protección y antideslizantes, así como calzado de seguridad.

## HANDLING

1. We recommend the use of a fork-lift to move and lift the boxes with thinbig® product, taking the centred boxes from the long end. If the box is taken from the short end we recommend the use of 2.5-metre long forks and if it is taken from the long end, then the fork should be at least 1.2 metres long.

To prevent the box from bending, causing the breaking of the product, the forks should be separated to the maximum.

2. The handling of the plate will always be carried out with the boxes close to the surface to be covered, with the help of someone else (never alone), holding the upper section and keeping it straight, with the corners well protected against accidental impacts. If this is not done properly, cracks might appear in the piece, which will later originate breakages.

A more robust option to handle the piece manually can be achieved with double suction clamps placed on a frame (this equipment may be purchased in points of sale specialising in building materials). The flexion of the pieces is achieved with this tool.

3. Rest the thinbig® piece on the long side and place it always on soft material (polystyrene, rubber, wood...) with enough separation. Place it against the wall at an approximate angle of 30°.

4. To store it horizontally, rest the piece on the worktop avoiding its bending. It is very important to ensure that the surface is clean and that it is even; otherwise it might cause the breakage of pieces when cutting or drilling.

Always wear protective anti-slip gloves when handling the pieces manually, as well as safety footwear.

### CORTE Y PERFORADO

Las placas thinbig® se pueden perforar fácilmente con herramientas diamantadas utilizadas normalmente para trabajar el vidrio y el gres porcelánico, en seco o con agua. Disponer de una superficie de trabajo limpia y plana antes de proceder a cualquier manipulación.

1. Cortes lineales: se pueden utilizar cortavidrios o cortadoras de raíl del tamaño adecuado al corte. Se debe cortar la superficie de la pieza de un extremo a otro, sin detener el corte y siempre con una presión uniforme. Una vez efectuada la incisión se ejerce una leve presión sobre las dos partes.
2. Orificios: si el orificio es <10 mm. de diámetro se debe utilizar el taladro eléctrico a una velocidad baja de rotación. No hay que ejercer una elevada presión sobre la superficie de la pieza. Para orificios > 10 mm. de diámetro se deben utilizar coronas perforadoras. Se recomienda también la realización de radios en las esquinas para evitar roturas por tensiones.
3. Cajeados de luz, enchufes...: perforar los orificios con las puntas de taladro en los vértices de la apertura que se desea realizar y posteriormente utilizar una cortadora eléctrica con discos diamantados de banda continua para las líneas rectas.
4. Para un correcto acabado hay que evitar los bordes afilados. Rematar los bordes con una lija abrasiva.

### RECOMENDACIONES DE COLOCACIÓN

Una colocación adecuada y cuidadosa de los productos thinbig® es vital para hacer resaltar al máximo las características técnicas de los mismos. Por este motivo, es necesario:

#### Previo a la colocación:

1. Verificar el calibre, tono y calidad del producto, antes de la colocación.
2. Escoger herramientas de instalación adecuadas (llana dentada, ventosa y llana de goma para la aplicación de la junta).
3. Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad, si no, se pueden crear bolsas de aire en la colocación y generar fisuras durante su uso.
4. Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado (norma de referencia: EN-1348). Se recomienda usar productos de resina epoxi.
5. Se recomienda el uso de sistemas nivelados como campanas o cuñas para garantizar una correcta colocación.
6. El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto.

Roca Cerámica recomienda colocar este producto con una junta mínima de 2 mm. para interiores y 5 mm. para exteriores y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).

#### Colocación:

1. Aplicar el adhesivo con un doble encolado sin dejar huecos, primero en el reverso de la pieza con una llana de dientes planos de 3 mm. y a continuación en el soporte con una llana de dientes inclinados de 6 mm., procurando cubrir también las esquinas y los bordes para evitar vacíos de aire entre el soporte y la pieza.
2. No aplicar el adhesivo sobre superficies de soporte extensas para evitar pérdidas de adherencia por secado. Las rayas de la llana, tanto en pieza como en soporte, deben tener la misma dirección para facilitar la salida de aire.
3. Golpear suavemente la superficie procurando así eliminar los huecos y burbujas de aire. Comprobar siempre la perfecta adhesión de las esquinas y aristas. No pisar el pavimento después de la colocación respetando los tiempos indicados por el fabricante del adhesivo.
4. No se debe utilizar junta de color que contenga negro de humo (carbón micronizado) ni tintes que pueden dificultar la limpieza de la superficie revestida.
5. Limpiar los restos de rejuntado de la superficie de las placas porcelánicas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.

### CUTTING AND DRILLING

The thinbig® plates may be drilled easily with diamond tools normally used to work with glass or porcelain stoneware, in dry conditions or with water. Make sure the work surface is clean and even before handling the piece.

1. Linear cutting: glass cutters or power cutters with the suitable size for cutting may be used. The surface of the piece should be cut from one end to the other, without stopping the cutting procedure and always applying uniform pressure. Once the incision has been made slight pressure should be applied to both pieces.
2. Holes: If the hole is <10mm diameter then the power drill should be used with a low rotation speed. High pressure should not be applied on the surface of the piece. Hole saws should be used for holes > 10mm diameter. We recommend the implementation of radii on the corners to avoid breakages due to strain.
3. Light mortising, sockets...: drill the holes with the drill tips on the corners of the opening that needs to be done and after that use a power drill with diamond discs with a continuous band for straight lines.
4. Sharp edges need to be avoided to obtain a perfect finish. Finish the edges with abrasive sandpaper.

### LAYING INSTRUCTIONS

An adequate and careful laying of the thinbig® products is essential to maximise their technical features. For this reason it is necessary to:

#### Prior to laying:

1. Verify the calibre, hue and quality of the product before laying.
2. Choose adequate installation tools (toothed trowel, suction grip and rubber trowel for pointing).
3. Ensure that the surface on which the material is to be laid is level, clean and insulated from dampness, otherwise, air pockets can originate during laying that might generate cracks during use.
4. Pay special attention to the type of adhesive to be used (check with your usual supplier of adhesive), as each type of ceramic requires the adequate adhesive (standard of reference: EN-1348). We recommend the use of products with epoxy resin.
5. We recommend the use of levelling systems such as wedges to ensure a correct laying.
6. The professional responsible for laying the material should choose the appropriate joints between pieces, as well as the perimeter joints in order to guarantee the correct absorption of structural movements and an allowance for dimensional tolerances of the product.

Roca Cerámica recommends laying this product with a minimum joint of 2 mm. for indoors and 5 mm. for outdoors and checking if there are other instructions in the box (measurement between calibres or recommended joint).

#### Laying:

1. Apply the adhesive with a double glue technique without leaving any gaps, first on the back of the piece with a 3mm notch trowel and later on the support with a 6 mm slanted notch trowel, trying to cover the corners and the edges as well to avoid air pockets between the support and the piece.
2. Do not apply the adhesive on very large surfaces to avoid the loss of adhesion due to drying. The lines of the trowel, both on the piece and on the support, should all have the same direction in order to facilitate the air flow.
3. Hit gently the surface to eliminate gaps or air bubbles. Always check the perfect adhesion of the corners and edges. Do not step on the floor tiles right after laying, respecting the time indicated by the manufacturer of the adhesive.
4. Do not use coloured pointing material containing black smoke (micronized carbon) or dyes which can hamper the cleaning of the covered surface.
5. Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the ceramic product such as metal spatulas or abrasive scourers. Always follow the instructions of the manufacturer of adhesives.

6. Una vez colocada la placa cerámica, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación de andamios o escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las placas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección, no debe dañar ni contener productos químicos que dañen al azulejo.

## MANTENIMIENTO Y LIMPIEZA

Para mantener la belleza y elegancia de la cerámica Roca, se aconseja la limpieza periódica del material con sistemas convencionales. Para la eliminación de restos de polvo y sólidos: por barrido o aspiración. No se deben utilizar mopas atrapa-polvo con siliconas y ceras. El lavado de la superficie se debe realizar con jabón neutro y la cantidad de agua caliente recomendada por el fabricante. No se deben usar productos de limpieza abrillantadores, cerosos o con aditivos similares ya que con el paso del tiempo pueden dejar una capa impermeabilizante sobre la cerámica que altera el aspecto superficial de la misma. Es recomendable la colocación de felpudos, que deberán permanecer limpios, en las entradas a los lugares pavimentados, ya sea desde la calle, terrazas o jardines, para evitar la entrada de elementos abrasivos. Se recomienda especial cuidado en zonas cercanas a playas u obras que pueden aportar arenas y piedras. Es aconsejable poner protecciones a los objetos que por arrastre pudieran marcar el producto (patas metálicas de mesas, sillas, etc.), teniendo especial cuidado con productos brillantes y satinados. Si la suciedad no se elimina completamente, facilitamos la siguiente tabla, donde se encuentran los agentes limpiadores adecuados para cada tipo de suciedad:

Tipo de mancha	Agente de limpieza
<b>Aceite, Tinta, Rotulador, Tomate, Frutas, Chocolate, Grasa</b>	Disolvente orgánico: alcohol, aguarrás o acetona Detergente alcalino ya sea en líquido o en polvo Bicarbonato
<b>Alquitrán, Caucho, Betún, Pintura, Graffiti, Cera, Resinas, Rotulador, Esmalte de uñas</b>	Disolvente orgánico: alcohol, aguarrás o acetona
<b>Café, Helado, Nicotina, Vino</b>	Detergente alcalino ya sea en líquido o en polvo
<b>Cal, Cemento, Cerveza, Depósitos metálicos, Refrescos, Zumos</b>	Ácidos diluidos: vinagre, sulfamán o ácido clorhídrico
<b>Cola, Goma de mascar, Goma de neumático o zapato</b>	Disolvente orgánico: alcohol, aguarrás o acetona Ácidos diluidos: sulfamán o ácido clorhídrico
<b>Sangre, Mercromina, Yodo</b>	Oxidante: Agua oxigenada
<b>Incrustaciones</b>	Agua a presión

Nunca hay que utilizar productos que contengan fluorhídrico, sólo los indicados en la tabla anterior.

Todos los productos indicados en la tabla se pueden encontrar fácilmente en droguerías y centros comerciales habituales.

### Especial para porcelánicos pulidos:

Una vez instalado todo el material y habiendo limpiado los restos de cemento, rejuntado y cualquier material de obra, en algunos productos pulidos, debido al tratamiento superficial de inertización "anti manchas" que se le realiza, puede observarse la presencia de una película "grasa" en la superficie de las piezas. En caso de presentarse esta situación, Roca recomienda la limpieza de la superficie con productos de limpieza en seco (detergentes en polvo), y una vez eliminada esa fina película protectora proceder a la limpieza del producto de la forma anteriormente indicada. Por otro lado, en condiciones extremas de iluminación se pueden producir reflejos y sombras debido al alto grado de brillo y las características del producto.

Se recomienda limpiar las manchas de forma inmediata.

6. Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds or ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.). If this cannot be avoided, always protect the tiles and joints to avoid subsequent cleaning or deterioration problems. The material used for this protection should not be harmful nor should it contain chemical agents that might damage the tiling.

## MAINTENANCE AND CLEANING

To maintain the beauty and elegance of Roca tiles, we recommend the daily cleaning of the material using conventional procedures. To remove remains of dust and solids: sweeping or vacuum cleaning. Do not use dust-catcher mops with silicone or wax. The cleaning of the surface should be carried out with neutral soap and the amount of water recommended by the manufacturer. Do not use cleaning products containing wax, brighteners or with similar additives as they may leave a waterproof layer on the tile over time that will affect its surface appearance. We recommend the use of doormats, which should remain clean, in the entrances to tiled areas, either from the street, terraces or gardens, to avoid the entrance of abrasive elements. Special care should be taken in areas close to beaches or construction works, as sand or stones might be brought in. We recommend placing protections on the objects that might damage the tile when dragged (metallic legs of tables, chairs, etc.), being especially rigorous with gloss and satin finished products. Should the dirt not be removed entirely, we provide the following chart, where you may find the suitable cleaning agents for each type of dirt:

Type of stain	Cleaning agent
<b>Oil, ink, marker pen, tomato, fruit, chocolate, grease</b>	Organic solvents: alcohol, turpentine, acetone Alkaline detergents in liquid or powder form Bicarbonate
<b>Tar, rubber, shoe polish, paint, graffiti, wax, resins, marker pen, nail varnish</b>	Organic solvents: alcohol, turpentine, acetone
<b>Coffee, ice cream, nicotine, wine</b>	Alkaline detergents in liquid or powder form
<b>Lime, cement, beer, metal deposits, soft drinks, fruit juices</b>	Diluted acids: vinegar, hydrochloric acid
<b>Glue, chewing gum, tyre or shoe rubber</b>	Organic solvents: alcohol, turpentine, acetone Diluted acids: hydrochloric acid
<b>Blood, mercromina, iodine</b>	Oxidant: oxygenated water
<b>Incrustations</b>	Pressurized water

Never use any products containing hydrofluoric acid, only those indicated in the table above.

All the products in this table may be easily found in ordinary household stores and shopping centres.

### Specially indicated for polished porcelain tiles:

Once the entire material has been laid and the remains of cement, pointing and other building material have been cleaned, on some polished surfaces the presence of an "oily" film can be observed due to the "stain-resistant" inertisation treatment they are given. Should this occur, Roca recommends the cleaning of the surface with dry-cleaning products (powder detergents), and once that fine protective layer has been removed, then clean the product as indicated previously. In extreme lighting conditions, light reflections might occur due to the high degree of brightness and the features of the product.

We recommend cleaning stains immediately.
